REASONS FOR ALLOWANCE

1. Claims 49-50,52-58,60-67 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's arguments are persuasive as to the fact that the prior art does not teach or suggest an etching process using a device having an inductively coupled plasma (ICP) source configured to generate a high-frequency electromagnetic alternating field including the step of producing a variably adjustable high-frequency power, which is coupled as plasma power into the ICP and which power is periodically varied or pulsed as the context of claim 49.
3. The closest prior art Lymberopulos et al (6,247,425) disclose a process for etching a substrate using ICP source, which is generating a high-frequency electromagnetic alternating field, wherein magnetic field is varied or pulsed (col.8, lines 50-51 and col.9, lines 28-42).

Lymberopulos et al but fail to teach producing a variably adjustable high-frequency power, which is coupled as plasma power into the ICP and which power is periodically varied or pulsed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
